1. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figures 22-27 to be labeled as " Prior Art" . In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

In claim 6, lines 3-4, " the non-inversion input terminal and the inversion input terminal" is now—an non-inversion input terminal and an inversion input terminal—.

2. The following is an examiner's statement of reasons for allowance: The examiner could not find fair suggestion for the vco with saw resonator, buffer circuit, voltage controlled phase shift circuit...the elements forming a positive feedback loop and having the SAW resonator temperature characteristic corrected by rotating the temp characteristic by a specified amount using the characteristic of propagation delay time of the buffer...

3. The references cited to Ogiso and Kobayashi et al show the general state of art for a SAW resonator VCO circuit having temperature compensation.
